

# Make your events *more memorable.*

Meet LUXFLY — the bionic butterfly by Luxtimb.

## THE PRODUCT

# Meet Luxfly, the bionic butterfly.

Luxfly brings movement, light and wonder to your event. Every part is chosen with care, from the aerospace-grade wings to our own self-developed control board.

01 —

**Aerospace-grade fabric**

Imported fabric for the wings. Highly durable.

02 —

**Butterfly-skeleton wings**

Ribs follow real butterfly proportions, made with carbon fiber rod.

03 —

**Self-developed PCB**

Control board designed in-house by Luxtimb.

04 —

**Customized servo**

HV servo motor, customized for Luxfly.

05 —

**2S LiPo battery**

180 mAh, 50C. Compact power for flight.

06 —

**Remote controller**

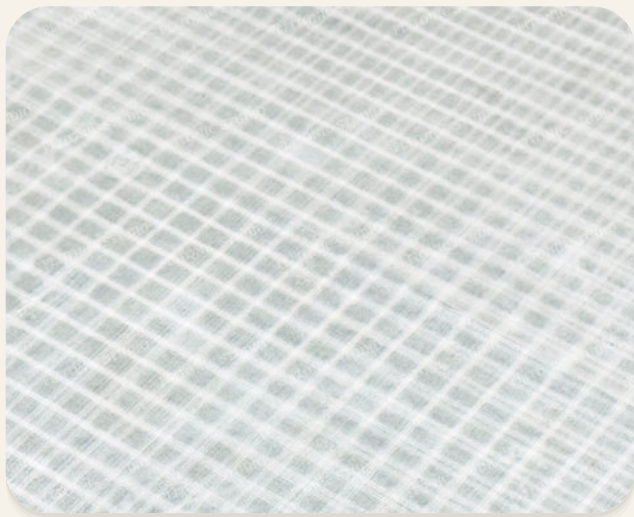

Hand-held control of your Luxfly.

## DESIGN &amp; MATERIALS

# Designed like a real butterfly.

## MATERIALS

## High-quality fabric

Made from imported aerospace-grade fabric, it is highly durable. Its fine grid weave keeps the wing surface strong.

Highly durable

## STRUCTURE

## Authentic butterfly wing structure

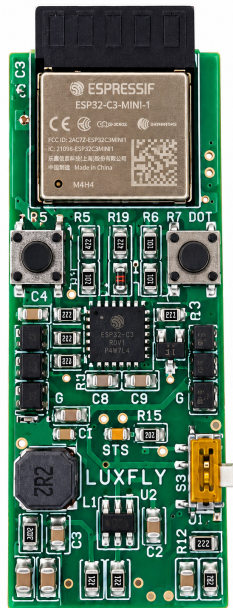

Wing ribs are refined based on real butterfly skeleton proportions, made with carbon fiber rod. Luxfly generates thrust through wing emulation.

- Real butterfly skeleton proportions
- Carbon fiber rod ribs
- Thrust through wing emulation
- Edge lighting on the wings

## SELF-DEVELOPED PCB

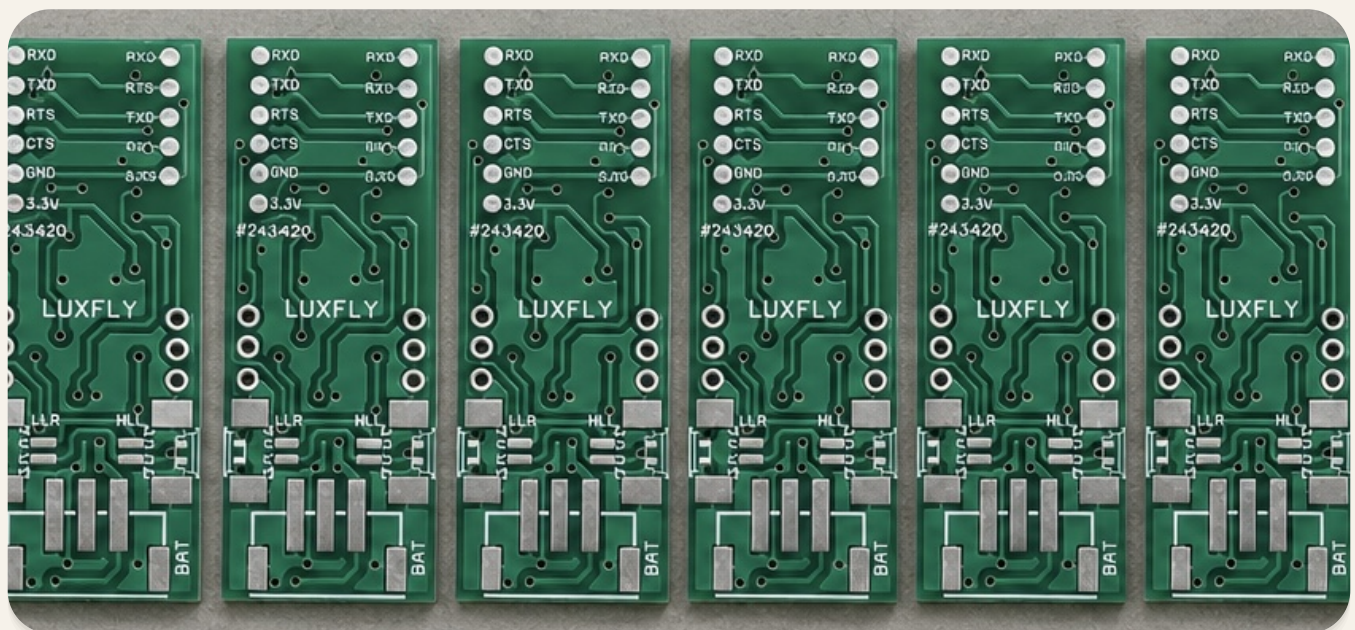

# The Luxfly control board.

## Designed in-house by Luxtimb

Our own PCB is made specifically for Luxfly. It keeps the electronics compact and gives us full control over quality and future improvements.

- **ESP32-C3 controller**  
Espressif ESP32-C3-MINI-1 wireless module.
- **Compact layout**  
Sized for the butterfly body.
- **Battery & power switch**  
On-board battery connection and switch.
- **Programming pins**  
UART pins (RXD, TXD, RTS, CTS) for programming and testing.

Luxfly PCBs, produced in batches.

## MOTOR, BATTERY, REMOTE

# Power and control.

## MOTOR

## Customized servo motor

A customized HV servo motor, branded Luxtimb, moves the Luxfly wings.

HV servo

Customized

## POWER

## 2S LiPo battery

A compact lithium polymer battery gives Luxfly its power.

2S

LiPo cells

7.4 V

nominal

180 mAh

capacity

50C

discharge

## CONTROL

## Remote controller

Fly and control your Luxfly by hand with a remote controller.

Hand-held remote
